Legamaster Glassboards
Cleaning & Care.

Start clean - Give your board a fresh start!

- Lightly spray the surface with Legamaster board cleaner.
- Wipe thoroughly using a microfibre cloth.
- Ensure the surface is completely dry before writing again.

Regular daily cleaning - Dry wiping!

For daily maintenance, dry wiping tends to deliver the best results, even though it may require a little extra effort.

Why dry wiping works best:

- The edding 95 glass marker features a rich, high-coverage ink that delivers outstanding visibility on glass surfaces.
- Because of this strong colour intensity, cleaning (too) wet may cause smudging and requires more effort, as the cloth cannot absorb ink and moisture at the same time.
- For best daily results, always wipe the surface clean using a dry cloth.

Allow the ink to dry completely before erasing.

For best results, let the writing dry for approximately 1 minute before wiping. This helps prevent smudging and makes cleaning easier.

Deep cleaning - Spray lightly!

- Lightly spray the surface with Legamaster Board Cleaner — avoid overspraying!
- Wipe the surface with a microfibre cloth until all ink is removed.
- Dry the surface thoroughly. If necessary, finish drying with a clean towel.
- Make sure the glassboard is completely dry before writing again.

To maintain best cleaning results:

- Wash your microfibre cloth regularly (up to 60°C).
- Store the cloth in an accessory holder to avoid ink marks on other surfaces.

Board cleaners

Legamaster Cleaner Sprays and Disposable Cleaning Wipes deliver powerful cleaning performance for intensive cleaning and wet erasing.

MAGNETIC EXTRA STRONG

Did you know?

Glassboards are made from layered materials, which means accessories need **extra-strong neodymium magnets** to stay securely in place. Regular magnets simply aren't powerful enough to pull through the glass and hold firmly to the steel backing.

That's why Legamaster magnetic glassboard accessories are made with high-performance neodymium magnets. Designed specifically for glass surfaces, they always deliver a secure and reliable hold.

Matching MATTE Glassboard Accessories

Designed to complement the MATTE glassboard collection, our accessories complete the look while enhancing everyday usability. Carefully colour-matched to our MATTE palette, they create a stylish, harmonious collaboration environment that follow the current trends in furniture and interior design.

From marker holders and accessory holders to magnets, the complete range keeps everything organised, neat and within easy reach. These accessories add both function and visual balance elevating the overall aesthetics of modern offices, open spaces and creative environments.

WOODEN glassboard accessories

For a natural look and feel, these wooden accessories bring warmth to your glassboard. Made from responsibly sourced wood from well-managed, FSC®-certified forests and other controlled sources (FSC® C158462).
